

NLC **SMART** **SOLUTIONS**

Let's get smarter

About us

Launched by NLC as fully owned subsidiary, NLC Smart Solutions (Pvt) Ltd is playing an important role in IT industry of Pakistan. The company is currently working to bring forward technology that is fully connected through Internet of Things (IoT) to enhance the industrial growth.

Vision

To become the best IT solution provider within national borders, envisioning country to be fully digitalised in years to come.

Mission

Emerge as a leading IT, IoT and E-Learning solutions provider.

Internet-of-Things (IoT)

Tracking & Fleet Management

NLC Smart Solutions offers complete package of tracking and monitoring of vehicles and assets. State-of-the-art solutions with all modern features of fleet management services are being provided to public and private sectors.

Smart City:

Modern era has witnessed automation in every sphere of life - be it offices, commute and transportations, entertainment, security and policing. Combine these together builds a "Smart City". NLCSS has state-of-the-art

technological solutions to transform any metropolis into a Smart City.

Smart Homes:

NLCSS offers cutting edge technological solutions to transform your house into a smart home. The company guarantees your information and security to remain unsurpassed. There's is no other company that offers such security and peace of mind.

Information Technology

Enterprise Resource Planning

The company is offering latest ERP solution in collaboration with best software providers. ERP enables a business, to collect, integrate, manage and interpret data from various departments / businesses to enhance organisation's efficiency. It is one of our core product that enable any larger organisation to obtain and manage data across different departments besides maintaining customers' portal, simultaneously.

E-Office

The working of modern office environment hugely depends on the quality of information technology platforms. Office correspondence is mostly done through email platforms that are unstructured which makes record keeping difficult. NLCSS offers its valued customers a state-of-the-art e-office solution which is structured, has inbuilt traceability mechanism with time stamps and helps in achieving the concept of paperless office.

Data Centers

We provide our clients with data centre services on turnkey basis. Networks, data storage, systems integration, security, power and infrastructure – we specialise in all facets of building and deploying data centers.

Customised Software Solutions

The company offers turnkey software and hardware IT solutions to its valued clients.

Smart Education

We have collaborated with world's leading e-learning solutions providers to bring in technology enhanced classrooms including:-

- Content Management System
- Learning Management System
- Campus Management System
- Language Lab
