

NLC ENGINEERS

Dream Big, Build Bigger!

The Credible Name in Quality Construction

OVERVIEW

NLC Engineers proudly holds its position as one of the leading construction entity in Pakistan, playing pivotal role in national development endeavors. With a widespread national presence and dedicated Project Directorates for each administrative region, NLC Engineers has solidified its status as the preferred choice for clients across the public and private sectors, consistently delivering dynamic construction solutions. With a formidable track spanning over four decades, NLC Engineers has proven ability to construct intricate engineering projects, whether within bustling urban centers or in remote regions in challenging conditions. NLC Engineers have so far completed 262 projects while over 80 mega projects are currently in progress.

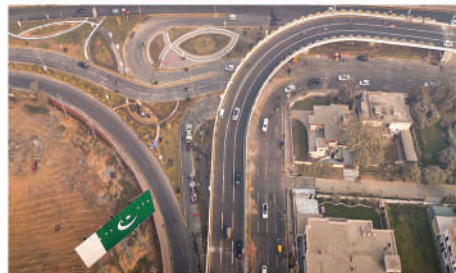

WHAT MAKES NLC ENGINEERS DIFFERENT

A pool of highly skilled engineers coupled with large numbers of NLC-owned modern construction machinery, and supported by a country-wide presence - all these factors give NLC Engineers exclusive edge to undertake any kind of construction work anywhere in Pakistan. Scores of iconic projects completed in urban centres as well as far flung areas bears testimony to high-end professionalism of NLC Engineers.
